

Prof. Brian Lin has taught in the Department of Public Finance at National Chengchi University since August 1997. He is also Associate Editor for The *Journal of Economic Surveys* (Impact Factor 2.299) and *Forum for Social Economics*. Brian has rich experience in administrative services, academic editorship, business advising, and international cooperation. He has lectured widely on the circular economy and sustainability issues in Taiwan, Japan, China, South Korea, and greatly enjoys his association in the East Asian region. To Brian, higher educational institutions are an important source of inspiration for individual students and the society as a whole. For individual persons, inspiration is the process of realizing an individual's knowledge capacity for furthering her or his working performance, economic status, living satisfaction, or social responsibility. In this regard, Brian has regularly led large groups of students to visit rural areas and remote tribes in order to generate learning inspirations for his students. For previous field trips, his students have often remarked that they felt like the child protagonists from the Chronicles of Narnia.
